

Full-System Solutions for Tow Tractors

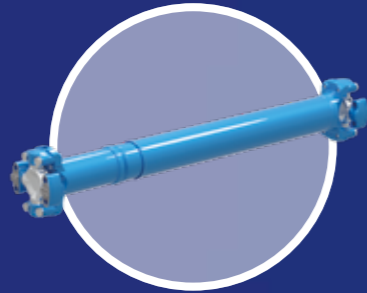

Our Spicer® drive solutions provide aircraft towing tractors with the compact power, low profile, durability, and versatility needed for busy airport environments.

As the aviation industry expands its sustainability initiatives, we're ready today with fully integrated electric-drive configurations that fit within current design envelopes.

Spicer® Planetary Steering Axles

- Deliver maximum performance and offer easy, low-cost service
- Modular design on several heavy axles and all medium axles
- Many configurations and options available

Spicer® Driveshafts

- Ideal for the rigorous demands of most mobile off-highway applications
- Designed for minimal maintenance, longer life, and reduced operating costs

Spicer Electrified™ eSP502

- Balanced performance, no working interruptions
- Dual-motor setup for system redundancy
